

READ AND UNDERSTAND THESE INSTRUCTIONS BEFORE PROCEEDING.  
RETAIN THESE INSTRUCTIONS FOR MAINTENANCE REFERENCE.

This fixture is intended for installation in accordance with the National Electrical Code and local regulations. To assure full compliance with local codes and regulations, check with your local electrical inspector before installation. To prevent electrical shock, turn off electricity at electrical panel before proceeding.

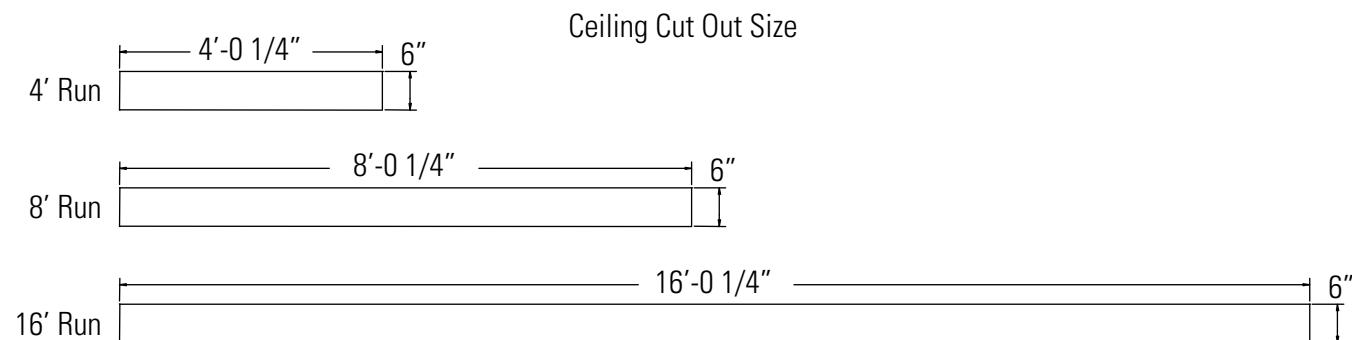

DO NOT INSTALL THIS SYSTEM IN A WET OR DAMP LOCATION.  
DO NOT ENERGIZE ANYTHING OTHER THAN THE FIXTURES IN THE SYSTEM.

CONTRACTOR IS RESPONSIBLE FOR ADEQUATELY REINFORCING CEILING TO SUPPORT FIXTURE WEIGHT.

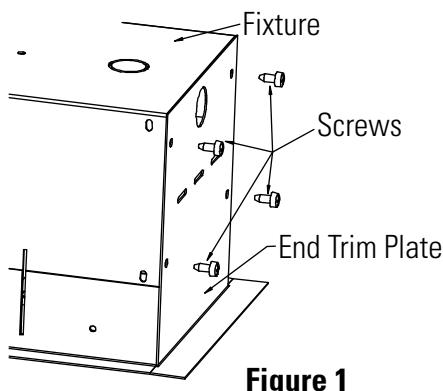

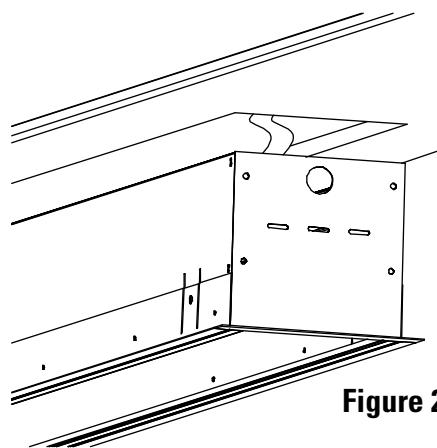

**Step 1. Cutting Out the Opening for the Fixtures**

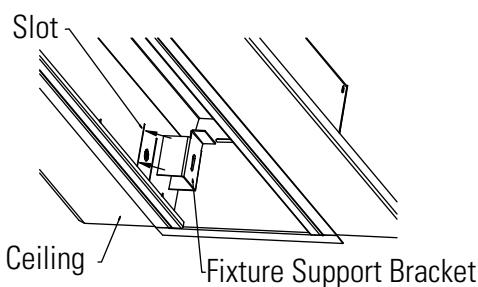

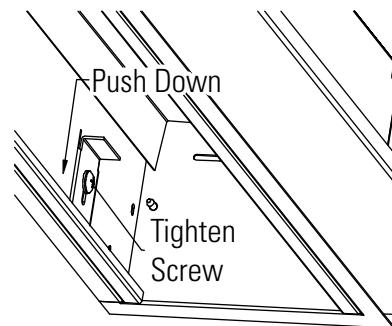

Cut out the opening for the desired run length.

**Step 2. Installing the First Fixture**

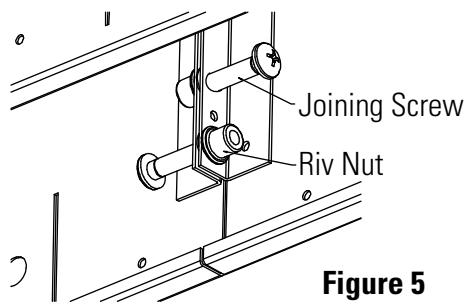

- Remove the knockout on the top of the fixture.
- Attach the end trim plate to the end of the fixture that will rest against the end of the opening. (Fig. 1)
- Lift the fixture to the ceiling and run the wires through the knockout and attach the conduit to the fixture. Then make electrical connections per NEC & local codes. (Fig. 2)

**Figure 1****Figure 2**

- D. Insert the fixture into the opening making sure that the flange rest flush with the ceiling and that the edge of the fixture is against the end of the opening.
- E. Insert the fixture support brackets into the slots on the inside of the fixture. (Fig. 3)
- F. While holding the fixture flush to the ceiling, slide the support bracket down until it hits the ceiling. (Fig. 3)
- G. Tighten the support bracket screw to hold it in place. (Fig. 4)
- H. Install the remaining support brackets the same way.

**Figure 3****Figure 4****Step 3. Installing the Remaining Fixtures**

- A. Lift the next fixture into the opening and hold it flush with the ceiling and against the previous fixture.
- B. Once the fixture is mounted connect wiring to the previous fixture by removing the reflector to access the wires in the ballast tray.
- C. Install the fixture support brackets as done with the first fixture.
- D. Insert and tighten the joining screws through the clearance holes on one fixture and into the riv-nuts on the other fixture. (Fig. 5)

**Figure 5****Step 4. Installing the Last Fixture**

- A. On the last fixture in the run attach the remaining end trim plate to the end of the fixture that will rest against the end of the cut out. (Fig. 1)
- B. Install the fixture the same as the others.
- C. Once all of the fixtures have been installed re-attach the reflectors, lamp the fixture, and install the louvers.
